## DETAILED ACTION

### *Response to Amendment*

Applicant's arguments with respect to claim 17 based on the Response filed on 2/15/2006 have been considered but are moot in the new ground(s) of rejection.

Therefore, this is Final action.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 17-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsuda et al. (US6097458A).

#### Claim 17:

Tsuda et al. teach (Figs. 2-4) a liquid crystal display device comprising

- a reflector 14 having a plurality of light reflective portions arranged randomly adjacent to each other on a surface of a base material of the reflector 14,
- each said light reflective portion having a curved surface with a maximum inclination angle at one side portion, disposed opposite to an observer, where the side portion having the maximum inclination angle at same side of each the light reflective portion as Fig. 4 shown, thereof so that the one side portion has a larger reflectance magnitude than an opposing side portion as Fig. 4 shown, and

Art Unit: 2871

- a light reflectance peak at a predetermined angle in accordance with a location of the maximum inclination angle, and that opposes a viewpoint of the observer.

wherein

Claim 18: the base material (aluminum) is reflective, thereby forming a reflective liquid crystal display device.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 17 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sasaki et al. (US6130736A) in view of Tsuda et al. (US6097458A).

Sasaki et al. teach (Figs. 1 and 4) a liquid crystal display device comprising:

- a pair of substrates 1/2,
- a liquid crystal layer 3 disposed between the substrates,
- the reflector 14 disposed on one of the substrates,
- a transparent intervening layer (a first overcoat layer 17a) disposed on the reflector,
- a color filter layer 16 disposed on the transparent intervening layer,
- a transparent planarization layer (a second overcoat layer 17b) disposed on the color filter layer,

Art Unit: 2871

- a transparent electrode (9 made of ITO (indium-tin-oxide)) disposed on the transparent planarization layer,
- an alignment layer (an orientation film 11) disposed between the transparent electrode and the liquid crystal layer.

However, Sasaki et al. fail to teach the reflector with feature in claims 17.

Tsuda et al. teach (Fig. 1A-B and 4) the reflector with feature in claim 17 for reflecting light incident thereon toward particular direction (col. 3 lines 64-65).

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to further modify a reflection type liquid crystal display device as Sasaki et al. with the reflector with feature in claim 17 for reflecting light incident thereon toward particular direction as taught by Tsuda et al. (col. 3 lines 64-65).

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 2871

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
